

EMPATHY MAP CANVAS

Ideation Phase — Empathize & Discover

DATE 29/09/26	TEAM ID SWTID-2026-8956	PROJECT NAME WeatherWise AI
TEAM SIZE 4	TEAM LEADER SANMATHI KUMAR	TEAM MEMBERS ARIFA ZOHRA, AINUL LIYANA P M, VAISHALI S

User Persona: Alex (Travel Enthusiast & Outdoor Explorer)

THINK & FEEL "I wish I didn't have to check multiple apps to know what to wear." "Will unexpected weather ruin my outdoor itinerary?" "Raw humidity and wind numbers are confusing—I just want clear advice." - Wants a seamless way to save and sync favorite cities across devices.	HEAR "Check local weather forecasts before heading out!" "AI recommendations make trip planning so much faster and easier." "Most weather applications show raw data instead of helpful context." - Friends complaining about getting caught in unexpected weather.
SEE - Cluttered weather dashboards displaying raw numerical data metrics. - Fragmented applications lacking unified location tracking. - Travel blogs suggesting activities without live environmental context. - Various weather icons without actionable insights.	SAY & DO - Manages and tracks multiple travel destinations manually. - Queries weather endpoints repeatedly to plan daily travel routines. - Requests personalized outdoor activity and clothing suggestions. - Shares travel tips and weather updates with travel companions.

User Pain Points & Desired Gains

PAIN - Difficulty tracking and managing multiple favorite weather locations efficiently. - Lack of personalized recommendations for outdoor activities or clothing. - Frustration from parsing raw metrics instead of simple natural language summaries. - Absence of a secure system to store and sync preferences across devices.	GAIN - Centralized location management with instant real-time weather retrieval. - AI-generated, natural language summaries and context-aware advice via Gemini. - Secure JWT authentication ensuring synchronized user preferences. - High platform reliability with built-in fallback modes during outages.
