## 1. CUSTOMER SEGMENT(S)

CS

Who is your customer? Target audience for adoption.

- **Travel Enthusiasts:** Planning trips requiring contextual outdoor attire/activity advice.
- **Daily Commuters:** Seeking real-time insights without analyzing complex data.
- **Multi-Device Users:** Needing synced location tracking across platforms.

## 6. CUSTOMER CONSTRAINTS

CC

What limits their choices or ability to act?

- **Data Fatigue:** Limited time to interpret barometers, humidity %, or wind speed.
- **Connectivity:** Fluctuating networks require fast lightweight REST API responses.
- **Device OS:** Needs cross-platform support (Windows, macOS, Linux, Mobile).

## 5. AVAILABLE SOLUTIONS

AS

What current alternatives do customers use?

- Standard Weather Apps & Web Widgets (e.g., native OS apps).
- **Pros:** Accurate raw numerical temperature metrics.
- **Cons:** Lacks natural language summaries, personalized outfit tips, or tailored activity suggestions.

## 2. JOBS-TO-BE-DONE / PROBLEMS

J&P

Which critical problems do you address?

- **Location Sync:** Effortlessly manage saved favorite cities across sessions.
- **Raw Data Overload:** Eliminate manual interpretation of weather parameters.
- **Contextual Advice:** Get tailored clothing/activity suggestions instantly.

## 9. PROBLEM ROOT CAUSE

RC

Why does this real problem exist?

Traditional meteorological platforms are designed around standard numeric presentation rather than practical human decision-making, forcing users to manually map weather data to lifestyle needs.

## 7. BEHAVIOUR

BE

What actions do customers take today?

- Checking basic weather apps daily before dressing or heading out.
- Searching online travel forums manually to guess suitable outdoor activity conditions.
- Repeatedly searching for identical location forecasts without persistent history.

## 3. TRIGGERS

TR

What prompts the customer to act?

- Planning travel or weekend outdoor events.
- Sudden or unexpected local weather transitions.
- Morning commute preparation.

## 10. YOUR SOLUTION

SL

Your tailored proposition fitting constraints.

**WeatherWise AI RESTful API:** Decoupled MVC architecture pairing Node.js/Express and OpenWeatherMap with Google Gemini AI to transform raw live metrics into natural language summaries and actionable lifestyle advice.

## 8. CHANNELS OF BEHAVIOUR

CH

Where do customers perform actions?

- **8.1 Online:** REST API endpoints, Web/Mobile clients, Postman integrations.
- **8.2 Offline:** On-the-go travel decisions, physical activity planning.
